

Bachelor of **Cognitive Enterprise**

Transform businesses into Cognitive Enterprises using the latest disruptive technologies such as Artificial Intelligence (AI) and Blockchain with a degree co-designed with global technology giant IBM®.

What is Cognitive Enterprise?

A Cognitive Enterprise is a business that combines innovative business processes with the latest technologies to offer superior products and services.

Whatever industry, whatever size business – technology is transforming the way business gets done.

From artificial intelligence to 5G and automation, technology is changing business models, reinventing processes and transforming the way we work.

Demand for skills in emerging technologies is growing exponentially as businesses embrace digital systems and services. The Australian Government has allocated \$1.2 billion in 2021-22 Federal Budget, through its Digital Economy Strategy, to grow Australia's future as a modern and leading digital economy.

Business professionals need the skills to adapt to this new way of doing business.

By studying our Bachelor of Cognitive Enterprise program, you can take a lead role in the digital transformation of businesses worldwide.

Our program

The new **Bachelor of Cognitive Enterprise** degree has been created in response to industry needs. Co-designed with IBM®, the program provides you with the foundational knowledge and skills to deal with technological and strategic demands of contemporary and future business settings.

You will develop strong business skills such as strategic, entrepreneurial and innovation skills required to lead businesses in a digital-focussed environment. You will also develop an understanding of how the latest technologies are changing the business world.

Our partnership with IBM® will see you job-ready by earning IBM® Digital Badges (certifications) in Blockchain and AI during this degree. These Digital Badges are only available through IBM® partner organisations like Federation University.

Work integrated learning is embedded in all Federation Business School programs, so you can start your career while you study.

Career opportunities

Graduates will be prepared for an exciting career working at the forefront of innovation and digital transformation in a wide range of corporate, not-for-profit and government organisations.

Federation Business School has close ties to industry and our graduates are in high demand. Many graduates gain employment through work placements completed throughout their degree.

A range of career outcomes is available upon graduation, including Digital Transformation Officer, Business Analyst, Systems Analyst, Change Management Consultant, Big Data Officer, Business Process Analyst and Technology Manager.

Application information
